

15.8T Motor Grader

T-REX1158S

T-REX1158S is a product of high speed, high efficiency, high accuracy and multiple purposes developed with European advanced technology, which can be used for ground leveling and grooving, scraping slope, bulldozing, ploughing snow, loosening, compacting, material arrangement and mixing works, and is widely used in construction operating condition of road, airport, defence engineering, mine construction, road construction, water conservancy construction and farmland improvement and so on.

Specs

General Specs	
Overall Working Weight	15800kg
Rated power	146kW
Max. tractive force	82kN
Overall dimension	8975X2710X3240mm
Max. inclination angle of front wheel	18°
Max. swing angle of front axle	16°
Max. steering angle of front wheel	50°
Steering angle of articulated frame	23°
Cutter size (LxHxT)	3962x610x25mm
Min. turning radius	7.6m
Cutting depth of blade	787mm
Max. speed	38km/h
Engine model	BF6M1013EC
Emission standard	China Phase III
Fuel tank capacity	300L
